DAY 2				New Zealand Coastal Society Annual Conference 2018, Gisborne
start	end			DAY 2: 22 NOVEMBER 2018
08:00	9:00			REGISTRATION
9:00	9:50			KEYNOTE 2 Nicola Litchfield
9:50	10:00			ROOM RESET
	DAY 2	SESSION 1		TITLE
start	end	Stream 1		Tsunami and Hazards 1
10:00	10:20	31	Borrero	Tsunami Inundation Modelling and Evacuation Planning for the Gisborne District
10:20	10:40	32	Bosserelle	Investigation of tsunami secondary impact in Gisborne: Dune erosion and tsunami debris
10:40	11:00	33	Lane	Tsunamis – not just a cascading seismic hazard
11:00	11:20	34	Todd	Christchurch's Flooding Multi-Hazard Study
		Stream 2		Tools and Techniques
10:00	10:20	35	Quilter	Examining the potential for coastal monitoring using UAV ('drone')
				Dipping the Ocean – Combining a heavy lift drone and Precision GPS to profile the seabed along SH1 Ohau
10:20	10:40	36	Perwick	Point - Kaikoura to provide additional data for wave modelling in the hazardous rocky inshore zone to
				protect the new highway and railway line
10:40	11:00	37	Livingston	Fisheries New Zealand and marine plastics
11:00	11:20	38	Restall	Biodiversity and coastal resilience enhanced with modern geosynthetic solutions in the near shore,
				intertidal and coastal dunes of New Zealand, the Pacific and beyond.
		Stream 3	-	Coast Processes and Morphology
10:00	10:20	39	Веуа	Challenges on the understanding of physical processes in the Hawke's Bay coast and marine environment
10:20	10:40	40	Jenks	Restoring the Natural Functional Capacity of Coastal Dune Ecosystems: Utilising Research Records for New
10.10	11.00	44	c: c :::	Zealand Littoral Refurbishment as a Proxy for Analogous Global Responses.
10:40		41 42	Simons-Smith	Coastal Landforms as Assets – Foredune Notching, St Kilda Beach, Dunedin
11:00	11:20	42	Davies-Campbell	The influence of sand bar morphology on surfing amenity at New Zealand beach breaks
11.20	11.45			
11:20	11:45			MORNING TEA
11:20		SESSION 2		
		SESSION 2 Stream 1		TITLE
start	DAY 2 end	Stream 1		TITLE Coastal Hazards Management 2
	DAY 2		Balkham	TITLE
start	DAY 2 end 12:05	Stream 1	Balkham Robichaux	TITLE Coastal Hazards Management 2 Defining levels of service and understanding residual risk to enable effective and efficient design of coastal
start 11:45	DAY 2 end 12:05	Stream 1 43		TITLE Coastal Hazards Management 2 Defining levels of service and understanding residual risk to enable effective and efficient design of coastal infrastructure Evaluation Coastal Risk Management Decision-making Using Fuzzy Cognitive Mapping
start 11:45 12:05 12:25	DAY 2 end 12:05 12:25 12:45	Stream 1 43 44 45	Robichaux Brown	TITLE Coastal Hazards Management 2 Defining levels of service and understanding residual risk to enable effective and efficient design of coastal infrastructure
start 11:45 12:05 12:25	DAY 2 end 12:05 12:25	Stream 1 43 44	Robichaux	TITLE Coastal Hazards Management 2 Defining levels of service and understanding residual risk to enable effective and efficient design of coastal infrastructure Evaluation Coastal Risk Management Decision-making Using Fuzzy Cognitive Mapping Managing landfill at eroding coasts: international guidelines put into practice
start 11:45 12:05 12:25	DAY 2 end 12:05 12:25 12:45	Stream 1 43 44 45	Robichaux Brown	TITLE Coastal Hazards Management 2 Defining levels of service and understanding residual risk to enable effective and efficient design of coastal infrastructure Evaluation Coastal Risk Management Decision-making Using Fuzzy Cognitive Mapping Managing landfill at eroding coasts: international guidelines put into practice Impact of forestry wood waste on the beaches of Tairawhiti with a particular focus on the Uawa Catchment
start 11:45 12:05 12:25 12:45	DAY 2 end 12:05 12:25 12:45	Stream 1 43 44 45 46 Stream 2	Robichaux Brown Cave	TITLE Coastal Hazards Management 2 Defining levels of service and understanding residual risk to enable effective and efficient design of coastal infrastructure Evaluation Coastal Risk Management Decision-making Using Fuzzy Cognitive Mapping Managing landfill at eroding coasts: international guidelines put into practice Impact of forestry wood waste on the beaches of Tairawhiti with a particular focus on the Uawa Catchment and Tolaga Bay
start 11:45 12:05 12:25 12:45	DAY 2 end 12:05 12:45 13:05	Stream 1 43 44 45 46 Stream 2	Robichaux Brown Cave	TITLE Coastal Hazards Management 2 Defining levels of service and understanding residual risk to enable effective and efficient design of coastal infrastructure Evaluation Coastal Risk Management Decision-making Using Fuzzy Cognitive Mapping Managing landfill at eroding coasts: international guidelines put into practice Impact of forestry wood waste on the beaches of Tairawhiti with a particular focus on the Uawa Catchment and Tolaga Bay Biology
start 11:45 12:05 12:25 12:45 11:45 12:05	DAY 2 end 12:05 12:45 13:05	Stream 1 43 44 45 46 Stream 2 47	Robichaux Brown Cave Wolf	TITLE Coastal Hazards Management 2 Defining levels of service and understanding residual risk to enable effective and efficient design of coastal infrastructure Evaluation Coastal Risk Management Decision-making Using Fuzzy Cognitive Mapping Managing landfill at eroding coasts: international guidelines put into practice Impact of forestry wood waste on the beaches of Tairawhiti with a particular focus on the Uawa Catchment and Tolaga Bay Biology The development of marine tube-dwelling worms and their aggregations
start 11:45 12:05 12:25 12:45 12:45 12:05 12:25	DAY 2 end 12:05 12:45 13:05 12:05 12:25	Stream 1 43 44 45 46 Stream 2 47 48 49 50	Robichaux Brown Cave Wolf Marsden	TITLE Coastal Hazards Management 2 Defining levels of service and understanding residual risk to enable effective and efficient design of coastal infrastructure Evaluation Coastal Risk Management Decision-making Using Fuzzy Cognitive Mapping Managing landfill at eroding coasts: international guidelines put into practice Impact of forestry wood waste on the beaches of Tairawhiti with a particular focus on the Uawa Catchment and Tolaga Bay Biology The development of marine tube-dwelling worms and their aggregations Effects of anthropogenic and natural disturbances on seagrass in the Canterbury Region Heavy metal accumulation in decapods and its use in monitoring the marine environment. An 'Ecosystems Enhancement Programme' to support Renewable Energy Provision at the Coast
start 11:45 12:05 12:25 12:45 11:45 12:05 12:25 12:45	DAY 2 end 12:05 12:25 12:45 13:05 12:05 12:25 12:45 13:05	Stream 1 43 44 45 46 Stream 2 47 48 49 50 Stream 3	Robichaux Brown Cave Wolf Marsden Graham	TITLE Coastal Hazards Management 2 Defining levels of service and understanding residual risk to enable effective and efficient design of coastal infrastructure Evaluation Coastal Risk Management Decision-making Using Fuzzy Cognitive Mapping Managing landfill at eroding coasts: international guidelines put into practice Impact of forestry wood waste on the beaches of Tairawhiti with a particular focus on the Uawa Catchment and Tolaga Bay Biology The development of marine tube-dwelling worms and their aggregations Effects of anthropogenic and natural disturbances on seagrass in the Canterbury Region Heavy metal accumulation in decapods and its use in monitoring the marine environment. An 'Ecosystems Enhancement Programme' to support Renewable Energy Provision at the Coast Storm Surge 2
start 11:45 12:05 12:25 12:45 12:45 12:05 12:25 12:45 12:45 11:45	DAY 2 end 12:05 12:25 12:45 13:05 12:05 12:45 13:05 12:05	Stream 1 43 44 45 46 Stream 2 47 48 49 50 Stream 3 51	Robichaux Brown Cave Wolf Marsden Graham John Gorman	TITLE Coastal Hazards Management 2 Defining levels of service and understanding residual risk to enable effective and efficient design of coastal infrastructure Evaluation Coastal Risk Management Decision-making Using Fuzzy Cognitive Mapping Managing landfill at eroding coasts: international guidelines put into practice Impact of forestry wood waste on the beaches of Tairawhiti with a particular focus on the Uawa Catchment and Tolaga Bay Biology The development of marine tube-dwelling worms and their aggregations Effects of anthropogenic and natural disturbances on seagrass in the Canterbury Region Heavy metal accumulation in decapods and its use in monitoring the marine environment. An 'Ecosystems Enhancement Programme' to support Renewable Energy Provision at the Coast Storm Surge 2 Coastal inundation: what's the worst that can happen?
start 11:45 12:05 12:25 12:45 12:45 12:05 12:25 12:45 12:45 11:45 12:05	DAY 2 end 12:05 12:45 12:45 13:05 12:05 12:45 13:05 12:05 12:25	Stream 1 43 44 45 46 Stream 2 47 48 49 50 Stream 3 51 52	Robichaux Brown Cave Wolf Marsden Graham John Gorman Tyler	TITLE Coastal Hazards Management 2 Defining levels of service and understanding residual risk to enable effective and efficient design of coastal infrastructure Evaluation Coastal Risk Management Decision-making Using Fuzzy Cognitive Mapping Managing landfill at eroding coasts: international guidelines put into practice Impact of forestry wood waste on the beaches of Tairawhiti with a particular focus on the Uawa Catchment and Tolaga Bay Biology The development of marine tube-dwelling worms and their aggregations Effects of anthropogenic and natural disturbances on seagrass in the Canterbury Region Heavy metal accumulation in decapods and its use in monitoring the marine environment.
